A-Chorus	Chorus		Based on the Boss Chorus CE-3 Its my assumption that they cannot mention the Roland or BOSS brand for some of their chosen effects.
G-Chorus	Chorus		Roland Chorus Ensemble CE-1 Its my assumption that they cannot mention the Roland or BOSS brand for some of their chosen effects.
C-Chorus	Chorus		Based on the Boss Dimension C DC-2 Its my assumption that they cannot mention the Roland or BOSS brand for some of their chosen effects.
M-Chorus	Chorus		Likely Based on the Boss Super Chorus CH-1 Its my assumption that they cannot mention the Roland or BOSS brand for some of their chosen effects.
Jet	Flanger		Likely Based on the Boss Flanger BF-2
B-Jet	Flanger		Its my assumption that they cannot mention the Roland or BOSS brand for some of their chosen effects.
N-Jet	Flanger		
Trem Jet	Flanger	VALETON	Combined Flanger and Tremolo
V-Roto	Vibrato		Likely Based on the Boss Vibrato VB-2 Its my assumption that they cannot mention the Roland or BOSS brand for some of their chosen effects.
G-Roto	Vibrato		Based on the Roland Chorus Ensemble (Vibrato Mode) Its my assumption that they cannot mention the Roland or BOSS brand for some of their chosen effects.
Vibrato	Vibrato		Likely Based on the Boss Vibrato VB-2 but with wider range selectable Its my assumption that they cannot mention the Roland or BOSS brand for some of their chosen effects.
Vibrato T	Vibrato	VALETON	Special Vibrato effect with dynamic control which lets you create touch sensitive pitch modulation.
O-Phase	Phaser		Based on the MXR M101 Phase 90
G-Phase	Phaser		Based on the Boss Phaser PH-1 Its my assumption that they cannot mention the Roland or BOSS brand for some of their chosen effects.

S-Phaser	Phaser		Based on the Eector-Harmonix Small Stone Phaser
Pan Phase	Phaser	VALETON	A special, subtle phaser comines tremolo/pan variations
M-Vibe	Phaser		Based on Voodoo Lab Micro Vibe, which copies the original Uni-Vibe
Vibe	Phaser		Based on the original Shin-Ei Uni-Vibe Phase Shifter Chorus.
O-Trem	Tremolo		Based on the Demeter TRM-1 Tremulator
Sine Trem	Tremolo	VALETON	Sine Wave Tremolo with wide range
Bias Trem	Tremolo	VALETON	Bias Tremolo Wave with wide range
Detune	Pitch	VALETON	Combines a slightly shifted signal with the original to create a chorus-like tone
Bit Smash	Special	VALETON	Provides sample reducing effect
Auto Swell	Special	VALETON	This an auto swell effect to make the guitar sound like a violin.
Hold	Special	VALETON	Freeze effect to hold the note for a short period like a loop.
Freeze	Special	VALETON	Freeze effect to keep playing the sound at the moment of activation.

BBD Delay S	Delay		Analog Delay with Bucket Brigade Chips, likely based on the BOSS Delay DM-3, which was a stereo analog delay, you can hear the sound degrade as the repeats go on
Digital Delay S	Delay		Digital Delay started with the BOSS Digital Delay DD-3, which was a stereo digital delay, there the repeats did not degrade and were clean all the way until they faded.
Tape Delay S	Delay		Based on the Roland Space ECHO RE-201 Tape Delay Its my assumption that they cannot mention the Roland or BOSS brand for some of their chosen effects.
Ambience 1	Delay		Very likely these are based off the Electro-Harmonix Deluxe Memory Man or were inspired by it.
Ambience 2	Delay		
Pure	Delay		Likely based on the Solid State Tape Echo Delay
Analog	Delay		
Tape	Delay		
Ping Pong	Delay		
Slapback	Delay		
Sweep Echo	Delay		Likely based on the Binson ECHOREC Tape Delay Machine
Ring Echo	Delay		
M-Echo	Delay		Likely based on the first Boss Bucket Brigade DM-2 Delay
Sweet Echo	Delay		Based on the Maxon AD900 Analog Delay
999 Echo	Delay		Probably based on the BOSS RDD-10 Rack Delay Unit from the 80's. Since out of all the rack units i compared the settings to, the Boss RDD-10 does have the same controls, including a Tone control. * All my research points to this unit, since the manual description does not provide a name, I am positive it cannot be the TC 2290, because Hotone mentions that by name in their Ampere line. It's probably not the MXR Model 113 rack delay unit either since that is late 70's, and the settings point me to this one option. Short of asking Valeton directly this is what i have been able to find.

REV	Vintage Rack	Delay	VALETON	Producing a delay effect with lo-fi'd repeats
	Lofi Echo	Delay	VALETON	Producing a special delay effect with reversed feedback
	Rev Echo	Delay	VALETON	Producing a pure dual delay effect with Dual Echo separated L/R channel signal processing
	Dual Echo	Delay		Note: I think Valeton is trying to do the Andy Timmons Halo with this one.
	Ice Delay	Delay		Note: I think Valeton is trying to do the Andy Timmons Halo with this one.
	Broken Delay	Delay		This is a creative delay effect focused on "breaking conventions". It produces a "fragmented" sound characterized by stutters, jumps, and granularity, simulating effects like "signal glitches" or "device freezes".
REV				
REV	Room	Reverb	VALETON	Probably based on the 60's Tube Reverb Fender Units Based on a Solid State combo amp reverb.
	Hall	Reverb	VALETON	
	Church	Reverb	VALETON	
	Plate	Reverb	VALETON	
	Spring	Reverb	VALETON	
	Tube Spring	Reverb	VALETON	
	Amp Sprint	Reverb	VALETON	
	Studio	Reverb	VALETON
